

INTERNSHIP in ENVIRONMENTAL EDUCATION at the DAUPHIN ISLAND SEA LAB Summer 2017: June 1 – August 4

The Discovery Hall Programs at the Dauphin Island Sea Lab has a **summer internship** available for an **undergraduate** (junior, senior, or recent graduate) from groups currently **under-represented in marine science and environmental education**.

Interns assist the DHP education staff in our many summer programs for K-12 students, teachers and the public (see <http://www.disl.org/educational-programs>).

Located ~45 minutes south of Mobile, Alabama, the Dauphin Island Sea Lab (DISL) is the marine research and education facility for the state of Alabama. DISL's Discovery Hall Program is one of the largest marine education programs on the Gulf coast. This is a wonderful opportunity to learn more about environmental education, marine science and the Gulf coast while living at the beach!

Internship includes a \$3,500 stipend, room, and board.

The successful candidate should be interested in marine science and environmental education and have completed a minimum of one year of biology or education. Interns live in the newly renovated Sea Lab dorms and are expected to work some nights and weekends. Interns should be comfortable in the water, have a valid US driver's license, and be capable of handling some strenuous physical activity, high heat and humidity since many activities take place outside.

Visit www.disl.org/dhp_internship for further information.
Contact Ms. Sara Johnson at (251)861-2141 x7515 or DHPSummer@disl.org with questions.
